1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11, 17-24, drawn to wireless transceiver, die, mesh, carrier material, heat dissipating element, classified in class 361, subclass 708.
 - II. Claims 12-16, 30-32, drawn to carrier material, solder material and solderable elements, classified in class 428, subclass 195.
3. III. Claims 33-35, drawn to machine composed of transport element and rollers having a pattern thereon, classified in class 100, subclass 177.
4. IV. Claims 25-29, drawn to method, classified in class 156, subclass 60.
5. Inventions Groups I, II and IV are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process, such as by using a laser instead of a pressing operation to make the pattern.
6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 2835

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
